

Accelerated Review for Class 1 Structural Permits

Effective August 1st, 2010, the Department of Code Enforcement is proud to offer an accelerated review service for Class 1 Structural Permits.

Accelerated plan review is an optional service that enables projects to expedite the normal plan review process. This service will speed up the review process time from an anticipated review time of 15 to 20 business days to an anticipated review time of 7 business days. The anticipated review time may vary based upon the scope of the project and current workloads. This service does not guarantee permits. Plans are required to meet the necessary requirements of respective codes and ordinances. Plans found to be insufficient will require corrections and re-submittals.

Plan review fees for this service will be assessed at a rate of \$316.00 an hour.

Questions regarding accelerated review can be directed to Mark Sinsko, mark.sinsko@indy.gov or (317)327-4176.
